After Alm. Lamb, Bobb Peak, Feb'y 12th, 1825.

I received your dated 17th January
and observed its contents. I am surprised that the
short interval of time since I was at your convent
that you are all as forgetful as it appears. I am
sure to the best of my knowledge, that is distinctly
Did you that I could not, yet would not, sell
Negroes for less than ten cents; but I could not
make your other collections for fifteen so for
other people offering to do it for five, that may
be the case, and I could do it too for that.
I said I had no concern, and sell them to
whomever could give the most money for them
or I could have sold them several times, a year or
two ago, but what was my reason, because my
concern would not permit to sell. Due to the
reasons that would have caused to purchase. Therefore the extra
persons that wished to purchase. Therefore the extra
trouble I take in selling your negroes worth
the 100 cents. I mentioned it to Father Michael last
summer, and he says the trouble and responsibility
is wanted. The 10% sent and more, however Ladies, as it is the custom of the world to trade in, is to best advantage and you have had better offer to your Rogers seller. I wrote Mr. Robert Diggs about a month ago to try and collect your money of him, but he could not pay money and did not promise when he would, but said that he had wrote to you on the subject, so for any other actions they must wait the course of the laws.

There is two years since of Hatter debt from their Somerset. I called on him the other day and he now says he has a note of Catharine Sommers due him for $50. I was much astonished at it for I told him that I thought I had paid him for it. He told him that I thought I had paid him for it and never heard of it before. I'll tell my father.
is worth the 100° Cent. and more however I have not the advantage of time to write do. be so kind as to inform me of the state of your affairs, I am writing about a month ago to try and collect your money of him, but he could not pay money and did not promise when he would but said that he had written to you on the subject, as for the other letters they must await the leisure of the house. There is two years hire of rent due from him; yesterday I called on him the other day and he says he has a notice of theater, locomotive, due from him for 100°. I was much astonished at it; for I did not think I had paid him for 100°. He says that I should have paid him that the rent of theater was 100°. However he says that this rent of theater was only 100°. However he says that he should not wish me to pay him the 100°, I cannot account for the 100° I do not know what was about it and never heard of it before, tell my future...
Geo. W. Sacle to
Dr. Agatha
